## SUMMARY

Motivated software developer with hands-on experience in full-stack web development. Completed a coding bootcamp and currently pursuing a B.S. in Software Engineering at WGU. Skilled in HTML, CSS, JavaScript, Python, and Flask. A team player who enjoys collaborating with others, quick to learn, and eager to contribute to meaningful projects. Seeking a software developer role to apply and expand my full-stack skills while delivering real-world solutions.

## EDUCATION

### Western Governors University

*Bachelor of Science in Software Engineering*

Salt Lake City, UT

June 2025 – Expected June 2026

### York College

*Bachelor of Science in Business Marketing*

Jamaica, NY

February 2021 – June 2023

## EXPERIENCE

### Case Manager

*HANAC*

April 2025 – Present

*Corona, NY*

- Oversaw scheduling, data entry, and case documentation, improving case tracking accuracy and speeding up service delivery for clients
- Coordinated with cross-functional teams including Purchasing and Bookkeeping, helping ensure timely and precise billing processes.
- Maintained sensitive documentation while ensuring compliance with regulations and safeguarding client confidentiality

### Assistant Language Teacher

*INTERAC*

August 2024 – January 2025

*Toyama, Japan*

- Designed and delivered interactive English lessons, boosting student engagement and strengthening language skills
- Assisted lead teachers with grammar, pronunciation, and lesson planning, supporting smooth classroom operations and effective learning.
- Promoted cross-cultural understanding by introducing Western customs, enhancing students' global awareness and interest in English culture.

### Case Manager

*HANAC*

January 2023 – July 2024

*Jamaica, NY*

### Delivery Driver

*Amazon*

June 2021 – December 2022

*Woodside, NY*

## PROJECTS

### To-Do-List Collaboration Project | *Python, Flask, PostgreSQL, HTML, CSS, JavaScript*

- \* Built a full-stack productivity app for organizing daily tasks
- \* Engineered a responsive front-end UI with CSS and implemented dark mode toggle.
- \* Integrated back-end data storage with Flask and PostgreSQL for task persistence.

May 2025 – Present

### Simple Guessing Game Collaboration Project | *HTML, CSS, JavaScript*

- \* Developed a browser-based number guessing game with real-time input handling
- \* Leveraged DOM manipulation to manage game state and dynamic updates .
- \* Collaborated with a teammate to test and refine logic for user feedback.

April 2025 – Present

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, SQL (Postgres), HTML/CSS

**Frameworks:** Node.js, Flask, Bootstrap

**Developer Tools:** Git, Github, Visual Studio, PyCharm

**Libraries:** DOM API, Bootstrap, Jinja2
